WASEEM AHMAD ANSARI

Senior Software Engineer - AI & LLM Quality Evaluator - Search Evaluator

+91 92703 04741 | Waseemwdd0165@gmail.com | linkedin.com/in/waseem-ahmad-ansari-bba5771ab | waseemwdd0165-jpg.github.io | Malegaon, Maharashtra, India

PROFILE

Computer Engineer (B.E.) with nine years as a senior software engineer building software applications, websites, and mobile apps, and seven years evaluating the search and AI systems that shape what people find online. The two sides feed each other: knowing how a search stack or a language model pipeline is put together makes for sharper judgement of what it produces, and years of assessing that output against detailed guidelines make for more careful engineering. Builds in C#/.NET, Python, and Java against Oracle and MySQL back ends, and works across front-end and back-end development, functional and non-functional QA, LLM evaluation and alignment, prompt engineering, and multilingual localization. Based in Malegaon, Maharashtra, and works remotely.

CORE COMPETENCIES

Programming Languages	Python - C# - Java - C - C++ - JavaScript - SQL - PL/SQL
Web & Frameworks	.NET / .NET Core - ASP.NET Core - Entity Framework - MVC - HTML - CSS - JavaScript
Databases & Tools	Oracle (DBA & PL/SQL) - MySQL - MariaDB - Stored procedures - Git - Docker
Software Engineering & QA	Software engineering - Desktop applications - Application implementation - Functional & non-functional testing - UI development - Agile delivery - Code standards & mentoring
Web & Mobile Development	Responsive web design - Dynamic & static websites - Mobile app development - Cross-platform apps - Front-end & back-end integration
LLM Evaluation & Alignment	RLHF & response ranking - Preference data - Red teaming - Safety & policy review - Hallucination detection - Factuality checking - Rubric application - SFT data authoring
AI, LLM & Prompt Engineering	Prompt engineering - LLM optimization - Generative AI quality analysis - Model comparison - Chatbot & voice assistant testing - AI model training - AI content review
AI Data Operations	AI data quality assurance - ML data operations - Data validation - Data annotation - Multimodal annotation - Image, video & audio labelling - Dataset curation
Search & Ads Evaluation	Search engine algorithm evaluation - Information retrieval analysis - Digital advertisement quality - Relevance rating
Localization & Linguistics	Multilingual AI evaluation - Linguistic data - Transcription - Translation - Audio localization - Dubbing - Lip sync

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Jan 2017 - Mar 2025

Net Tech Services India Pvt. Ltd, Mumbai

- Contributed to the nationwide Cheque Truncation System (CTS) rollout for core banking - a regulated, high-availability environment where a failed deployment stops branch operations.
- Designed, built, and shipped software applications, websites, and mobile apps for clients, from first architecture decisions through to deployment.
- Led front-end and back-end integration work, keeping data flowing cleanly and the system secure.
- Ran thorough functional and non-functional testing, cutting the defect rate reaching production.
- Worked closely with UI/UX designers, product managers, and QA in an Agile setup, usually against tight deadlines.
- Mentored junior developers and helped settle on coding standards the whole team could work to.

Support Executive Officer
2016 - 2016

Net Tech Services India Pvt. Ltd, Mumbai

- Tested core software products, both functionally and for performance and reliability.
- Supported application rollouts and pitched in on UI development.

AI & LLM Quality Evaluator - Search Evaluator - Localization Analyst
2018 - Present

Freelance & contract work

- Rank competing model responses side by side to produce the preference data behind RLHF, applying detailed written rubrics consistently across high volumes of work.
- Red-team models for unsafe, biased, or policy-violating responses, and document what surfaces so it can be addressed.

- Check model claims against sources to catch hallucinated facts and fabricated citations.
- Write and refine prompts, and author ideal instruction-response pairs used in supervised fine-tuning.
- Authored original tasks for AI coding agents on Handshake AI's Project Dynamo, with quality rules, metadata, and calibrated difficulty.
- Evaluate model output across multiple languages, drawing on years of localization and linguistic work.
- Test chatbots and voice assistants for accuracy, tone, and whether they actually complete the task asked of them.
- Annotate and evaluate multimodal data - image, video, and audio alongside text - and validate training datasets before they reach a model.
- Rate search results and digital ads against quality guidelines, helping improve how accurately systems rank and match what people are looking for.
- Handle linguistic data work - transcription, translation, audio localization, dubbing, and lip sync - and design and build responsive websites for clients.

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering

2009 - 2015

University of Mumbai - Rizvi Education Society's College of Engineering

Examination held May 2015 - Second Class - Convocation 16 January 2017 - Certificate no. 0032270

Higher Secondary School Certificate (HSC)

2007 - 2009

The Malegaon Jr. College

ADDITIONAL INFORMATION

Availability	Open to remote contract and freelance engagements.
Working Style	Nine years delivering to client deadlines in Agile teams, and seven years of independent contract work requiring consistent output against written guidelines without direct supervision.
Languages	English, Hindi, Urdu, and Marathi - the basis for multilingual AI evaluation, transcription, and localization work.
Portfolio	waseemwdd0165-jpg.github.io - four working AI evaluation tools you can open in a browser, plus full experience and a downloadable CV.
